BOOK(LETS)S I HAVE WRITTEN: THE WAY FORWARD

Posted on August 31, 2020 by Eddie

British mission agencies are facing three broad issues which together form a perfect storm which threatens their future existence and their relevance to Godâ€™s work around the world. This booklet aims to introduce mission board members to some of these issues and to help them think through how to approach them.
Category: Observations

Over the last few weeks, I've mentioned that I am working on a booklet for mission agency boards. Well, it is now available either as a pdf download from here or as a Kindle book on Amazon. I'm afraid that unlike many of the resources that I produce it isn't a freebie; it will set you back a fiver. People who sign up to be patrons of the site will have free access to all of the paid-for resources that I produce.

The aim of the booklet is to introduce a number of the issues that mission agencies are facing today within a historical and missiological framework. Obviously, this means that complex issues are not given the space, nor the nuance that they really need. However, my aim has been to produce something that busy people can read in a relatively short time and which will either spur them on to reflect on their own agency or encourage them to read in more depth.

If you want to know the sort of thing that the booklet says before spending your hard-earned cash, you can find excerpts in these blog posts:
