SIDEBARS AND INTERNET EXPLORER

Thank you to the friend who pointed out that the sidebars of Kouya.net have not been showing up in Internet Explorer, but were showing up in Firefox and Opera. Apologies to the friend (you know who you are!) who first said that the site wasn't working, but I didn't believe her because it looked fine on my machine. It should be okay in Internet Exploerer now, but the moral of the story is that everyone should use Firefox!
