CHANGING THINGS AROUND

Posted on June 5, 2006 by Eddie

Category: Mission

You might notice, if you look closely, that there have been a few changes to the layout of this site. Thanks to the good work of Rob Miller at roblog, I've been able to make the book review and library section a bit more obvious. You can now get an overview of the books that we are currently reading and if you like the look of anything you can click straight through to Amazon and buy them. We'd strongly reccomend that you do this, because when you do, we get a percentage of the cost. The library section is on the left just below the random photo from our picture gallery.

If you were hoping for some actual content in this post, rather than just news of me moving things around (yet) again, then you can take a look at this link which is to a slightly embarassing article I recently wrote on short-term missions.
