SOMETHING GOOD TO READ

The latest edition of Words For Life, the Wycliffe UK magazine is just hot off the press and available for download. The magazine celebrates ten years of Vision 2025 and has lots of interesting articles, including an introduction by me (don't let that put you off):

> *Back in the spring of 1999, I remember sitting in a large conference hall with hundreds of delegates from all round the world discussing whether it would be possible to start a language project in every language that needed it by 2025. It isnâ€™t easy for a multi-national organisation with thousands of members working all over the globe to change, but as the Wycliffe leadership discussed and prayed, we sensed God speaking to us and Vision 2025 was born.*
