SOUL POLITICS

Category: Politics

Most people in Britain are already bored by the election coverage (don't worry, only three weeks to go). However, if you want to read insightful comment from a Christian point of view, I can't recommend the Soul Politics blog highly enough. Soul Politics vanished a while ago, but it has re-appeared for the election period. The blog's tag line is:

> *Christian political blog from the UK. Committed to both moral values and social justice, Soul Politics seeks to get to the spiritual roots of the 2010 General Election.*

So far the coverage has been fairly even handed and free from the sort of crude bias that you get with blogs such as Cranmer. Plenty of others are covering issues related to the election, but so far, no one is doing it as well as Soul Politics.
