A RABBIT PARABLE

Category: Observations

I'm never quite sure what to make of the Beaker Folk of Husborne Crawley blog. Most of the time, I find it mildly amusing, though I suspect I miss a good deal of the humour being neither an Anglican nor a Thomas Hardy fan. However, from time to time there is a post which is absolutely brilliant and deeply profound: like today's post about rabbits. It isn't the sort of thing that I can quote from in a meaningful manner, so you'll need to go over there and have a read yourself - but it's only short so you have the time.

While you are over at the Beaker Folk, have a look around at the rest of the blog, you may well enjoy what you find. With the author's permission, I adapted the script for the Thomas Hardy plot generator to produce the Bible version generator which you can find on the sidebar here.
