SCRIBESUB

The internet makes it very easy to publish articles online. However, it is very difficult to actually make money through online publishing, especially if you are not a famous writer.

One solution to this is ScribeSub an extremely easy to use online publishing platform. All articles on ScribeSub can be read for a dollar, of which most goes to the author. I'll be moving all of my articles over to ScribeSub in the next few weeks and any money that is generated from them will be given to charity.

Can I encourage you to take a look at the website and if you are an author, why not send them a few articles?

Currently the system is in beta, but a full version should be out soon.
