Dave Burke has a couple of excellent articles on using PowerPoint on his website, they are well worth reading if you are tempted to use Powerpoint to illustrate any talks, sermons or presentations you have to give:

- The Three Gifts of Powerpoint
- The Basics of Slide Design

> *by all means use the presentation templates supplied with PowerPoint â€“ but only if you want your slides to be unreadable and blend in with the dÃ©cor of the conference room. This may well suit your purposes; itâ€™s not everyone that has a vital message to communicate!*

Good thought provoking stuff!
