Well, never let it be said that I never give you anything!

I have a number of articles and such like that I would eventually like to pull together as a book of essays on the Bible and Mission. One section of the book will consist of articles from this blog on the subject of the Great Commission. For the moment, I've drawn these together and made them available as an ebook(let). Please feel free to read it, pass it around, tell others about it and otherwise encourage people to read it.

You can download the book in pdf, mobi (Kindle) and epub format.

The ebook publishing software had some problems with the section headings in my file and I couldn't seem to fix that - sorry.

If you have any comments on the content, I'd be glad to hear them.
