EXILES

I've just finished reading Michael Frost's excellent Exiles: Living Missionally in a Post-Christian Culture and want to suggest that as many other people as can buy it and read it too. It's a terrific book painting a very vivid picture of what Church life could and perhaps should be like in the 21 Century. It isn't a hard book to read, but it is extremely challenging. I think many people will read it and discover that Frost is talking about the sort of missional Christian community that they have been longing to belong to even if they had never thought of it in those terms.

David Couchman has a full revew here.
