Thanks to MGVH for the link to this excellent resource.

Get lost in Jerusalem is a computer based guide to the history and Geography of Jerusalem and is an excellent tool for anyone wanting to understand more about the background to the Scriptures. You can buy it from Amazon (or at least read the description) or you can download it for free here. Get Lost in Jerusalem is written by Professor Ted Hildebrandt who has lots of other teaching resources available on his site.

> *The program provides an excellent introduction to Jerusalem. You can take a "Guided Tour" or "Conquer Jerusalem' Environments" (which provides Geography, Timeline & History, and Theology info), or "Explore Virtual Jerusalem" which gives an interactive map approach.*
