BLOG PROBLEMS

Posted on March 6, 2006 by Eddie

Category: Computing/Internet

I've been having some problems with our blog software over the past few days and, unfortunately, I don't have time to work out what is going wrong. To smooth things out, I've had to remove the photograph gallery and I'm also having trouble including photographs into posts in the way that I want. Sorry about this, normal service will be restored as soon as possible!
